

CUBESPACE

LEASE OF MODULES

If you need temporary space for your activities and you do not want to become an owner of a structure, you can just lease a modular building from CUBESPACE. Short-term as well as long-term leases of individual modules and ready-to-use configurations are available. Lease-related services include project preparation, transportation of modules, assembly and dismantling of the structure.

Lease

We offer short- and long-term lease of buildings designed by us to be deployed as first apartments or social housing matching current needs of our clients. We arrange for leases in the Czech Republic as well as in other EU Member States or as clients wish.

Repairs

We are happy to arrange for transportation of modules to and from the site, including their handling using a crane of standard and atypical dimensions.

Our experienced installation teams will provide for comprehensive installation and disassembly of the subject matter of lease.

In addition to associated services, such as cleaning, power inspection or interior fittings and furnishings, we will also provide for repairs if requested by the client.

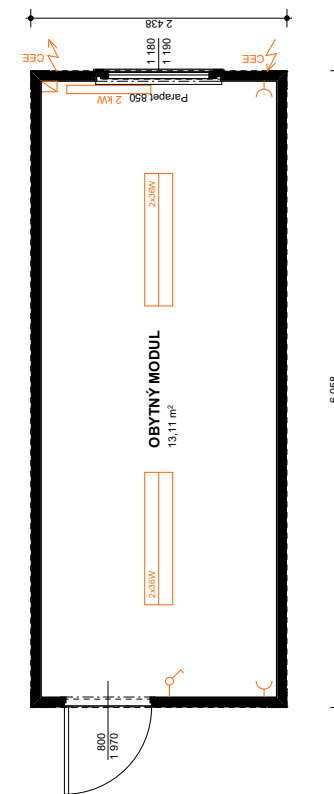

Financial services

We will be glad to consult and assist with selecting the optimum financial services.

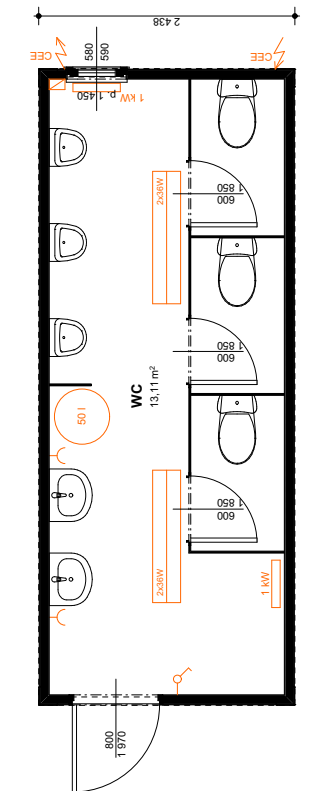

Our offer:

- Option to use leasing to finance the project
- Overhaul and sales of leased modules
- Manufacturing new standard, atypical and collapsible modules
